EXPERIENCE

Full Stack Developer | Influx Marketing | Pasadena, California | October 2022 – Current

- Manage over 500+ web design projects from start to finish using HTM, CSS, PHP, JavaScript, and React, and as well provide maximum up-time and reliability
- Migration and installation of new websites as well as update and upkeep
- Coordinate with Account Executive on helping clients integrate new technologies into their websites
- Ensure that there are no bugs in the code and fix any that arise
- Solid understanding of web server backend management

Software Engineer | Tepia Co. | Costa Mesa, California | August 2019 – October 2022

- Searched for bugs in upcoming software.
- Involved in testing the user experience and provided valuable feedback over features and what improvements could be made. This feedback was implemented into the final product
- Tech Stack: React Native, Laravel admin and API, MySQL database, Firebase
- Worked alongside with Senior Software Engineer to build app for clients.

Software Engineer | ClickThruHealth Startup | Newport Beach, California | April 2018 – July 2019

- Analyzed the existing software to modify backend server and tested end-user applications to meet user needs
- Investigated and resolved a wide range of technical issues such as bugs and hotfixes
- Tech Stack: React Native, Laravel admin and API, MySQL database, Firebase
- Familiarize myself with the ClickThruHealth app and learn the languages to maintain the app and build new features

PROJECTS

ChatterBox | 2022

- Developed front-end and back-end of application with integration and unit testing.
- Developed online chat with Firebase database to login with google email and Chatengine for chat service.
- Tech Stack: React, NodeJS, Firebase, Chatengine, Rest API, Axios, Sockets

whenLambo | 2022

- Developed front-end and back-end of application with integration and unit testing for a robust codebase
- Integrated CoinGecko API 7 day prices and averages of crypto coins into charts to optimize users view of data
- Developed features to purchase, sell, and track coins with real-time prices
- Built modular and reusable React Native UI components and integrated state management
- Tech Stack: JavaScript, React Native, NodeJS, Axios, Reanimated Charts, Multiple Select Library, Express, CoinGecko API, MongoDB
